Tour the Village buildings and grounds

Opportunity to tour our twelve historical buildings and 4 museums on the Village grounds.

## Curricular Lessons

Curricular lessons prepare and taught by local volunteers and retired educators.

- **2nd grade – "Choices and Consequences"**

- In second grade, students will learn about choices and consequences. They will engage in thinking and conversing about their own responsibility to take care of their community, focusing on cooperation and citizenship. They will also learn about how government plays a role in establishing and maintaining local community spaces.

- **3rd grade "Immigration and Migration"**

- In third grade, students study how and why people move from one place to another with the theme "Immigration and Migration." Students look at the geographic, political, and cultural reason that people move to a new place as well as what they experience during the transition. They understand that a society is a complex and changing place shaped by laws and the civic virtues of the citizens who live there.

- **4th Grade "Change and Continuity"**

- In forth grade, students focus on how society has changed and stayed the same over time. Students see how change is inevitable and the patterns and consequences of change across different historical eras.
